

ONT401 Semester 1 Practical 1

Due Date 21 March 2025 **by** 23:59

The **Strategy Pattern** is useful for designing a **flexible notification system** where different notification types (Email, SMS, Push Notification) can be selected dynamically.

Instructions:

- Please create a C# console application of a **notification service** that allows users to choose how they receive notifications (via **Email, SMS, or Push Notifications**).
- With your application, submit a pdf document which briefly states why it would be a good idea to implement the Strategy Pattern in this kind of application.
- Please submit a zip folder with both the project and the pdf (**NOT SEPERATELY**).
- The naming format of your zipped folder should be: Initials_Surname_StudentNumber_Prac1 and nothing else please.
